

# Home Safety Blanket

## Safeguards Families from Dangerous Home and Kitchen Fires

### Safer

Will not catch fire, blocks extreme heat and will not lose effectiveness over time like most fire extinguishers

### Easier

Unfolds to toss over a contained fire

### More Effective

Patented fabric controls and extinguishes flames without the messy clean up from fire extinguishers

**Tested for  
Exceptional  
Fire  
Protection**

# Home Safety Blanket

The 35" x 32" Kovenex Home Safety Blanket is available in a variety of packaging styles and is appropriate for consumer and industrial applications.

## Safer for Home Fires

The Kovenex Home Safety Blanket is an outstanding alternative to traditional fire extinguishers because of its ability to contain and extinguish fires safely and effectively. The Kovenex Home Safety Blanket eliminates the messy clean-up associated with fire extinguishers and will not lose effectiveness over time. No home workshop or kitchen should be without a Kovenex Home Safety Blanket.

## Patented Flame and Heat Resistance

Unlike ordinary fire blankets, the patented Kovenex fabric will *never catch fire or spread flames*. Made from a blend of high-performance fibers with amazing flame and heat resistance properties, Kovenex is tested to meet the standards of the **National Fire Protection Association** — the group that certifies professional firefighters' equipment.

Though the Kovenex Home Safety Blanket is a high-tech fire safety tool, it is lightweight and easy to display in kitchen, pantry, garage or tool sections in a retail environment. A variety of packaging options allow it to be easily displayed with fire extinguishers and other home safety products.
