

Occupational Safety Blanket

Multiprotection Evacuation Tool

Safer

Will not catch fire or tear, blocks extreme heat and protects employees in the workplace against open flames, shattered glass and sharp objects.

Easier

Engineered to smother fire or wrap around an individual for safe evacuation by protecting against burn and flying debris. It can quickly extinguish a small fire or apparel engulfed in flames and offers an added sense of security in the workplace.

More Effective

Kovenex's heat blocking capabilities are the result of its patented fiber blend, NOT chemical treatment, making it safe for contact with skin and more effective in preventing contact burns. It has no shelf life and can be washed and reused, setting it apart from other commercially available fire blankets.

The Kovenex Occupational Safety Blanket is a high-performance, flame-and-tear resistant blanket used in industrial and manufacturing workplaces to safeguard employees anywhere a fire could ignite. Tested to National Fire Protection Association (NFPA) standards, the organization that certifies firefighting equipment, Kovenex surpasses the performance of other blankets by offering employees the needed protection against fire, intense heat and burn, shattered glass and sharp metal edges.

Occupational Safety Blanket

Workplace Safety

The Kovenex Occupational Safety Blanket's ability to protect employees against burns allows employees to safely evacuate in the event of a workplace fire. Unlike ordinary fire blankets, the patented Kovenex fabric will never catch fire or spread flames. Its flame-and-tear resistant properties make the Kovenex Occupational Safety Blanket a necessity in every industrial and manufacturing environment.

Patented Protection from Flame and Heat

The Kovenex Occupational Safety Blanket is a high-tech fire safety tool. It is lightweight and easy to wall-mount or store in small spaces such as offices and control rooms, as well as on a manufacturing floor or anywhere where there is the possibility of a fire.

Fabric Weight: 8.5 oz/sq. yd.

Blanket Dimensions: 58" x 73"

Performance Specifications:

Thermal Protective Performance _____ 12 cal/cm²
Vertical Flame Test

After Flame _____ 0 seconds

Char Length _____ 8 mm

Tear Resistance _____ 190 N

The Kovenex Occupational Safety Blanket is engineered and manufactured by Waubridge Specialty Fabrics, LLC.
